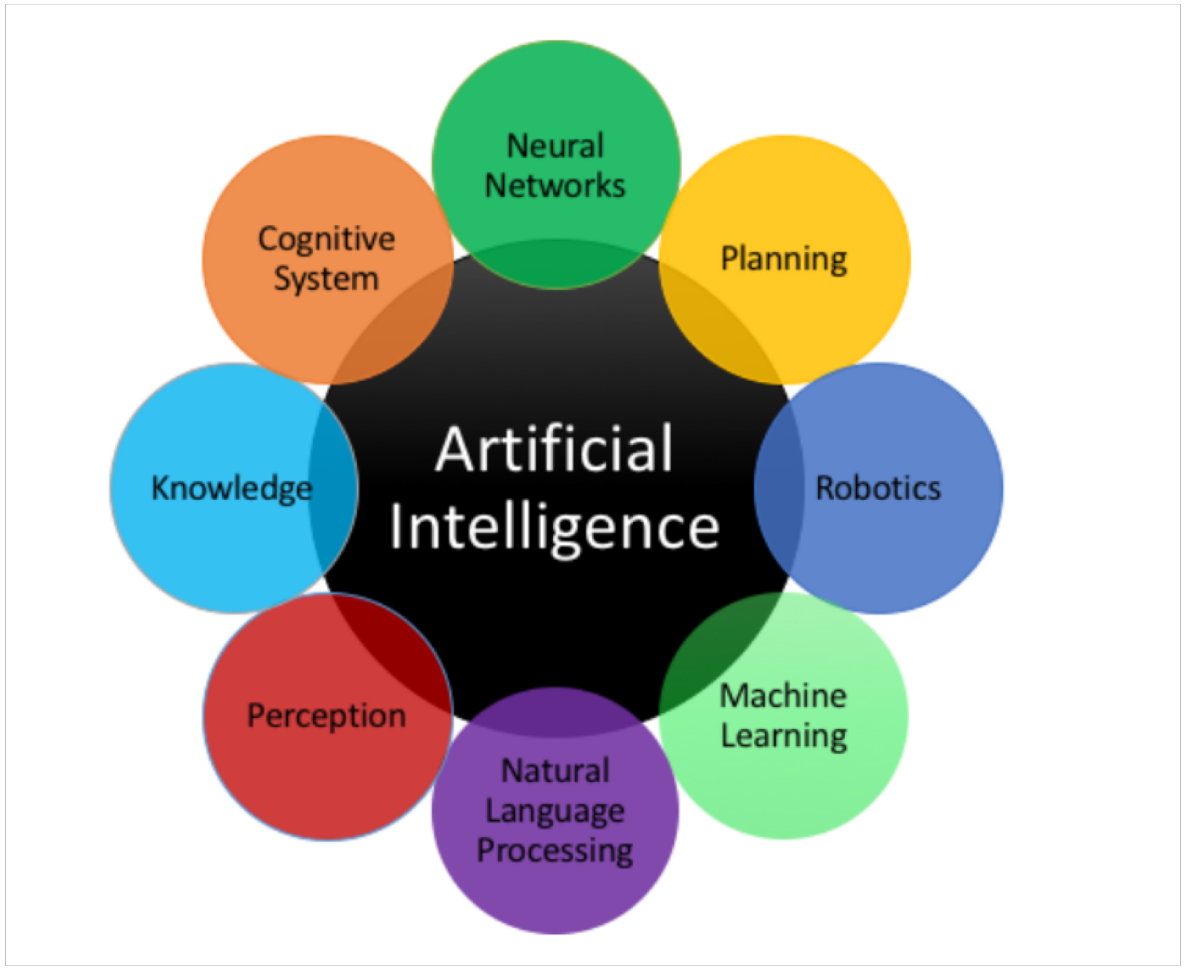
What potential impacts could artificial intelligence have on society?

A philosophical discussion about how control systems, artificial intelligence, and society fit together to create exciting and new opportunities for everyone.

What is AI?

- “Back in the 1950s, the fathers of the field Minsky and McCarthy, described artificial intelligence as any task performed by a program or a machine that, if a human carried out the same activity, we would say the human had to apply intelligence to accomplish the task.”



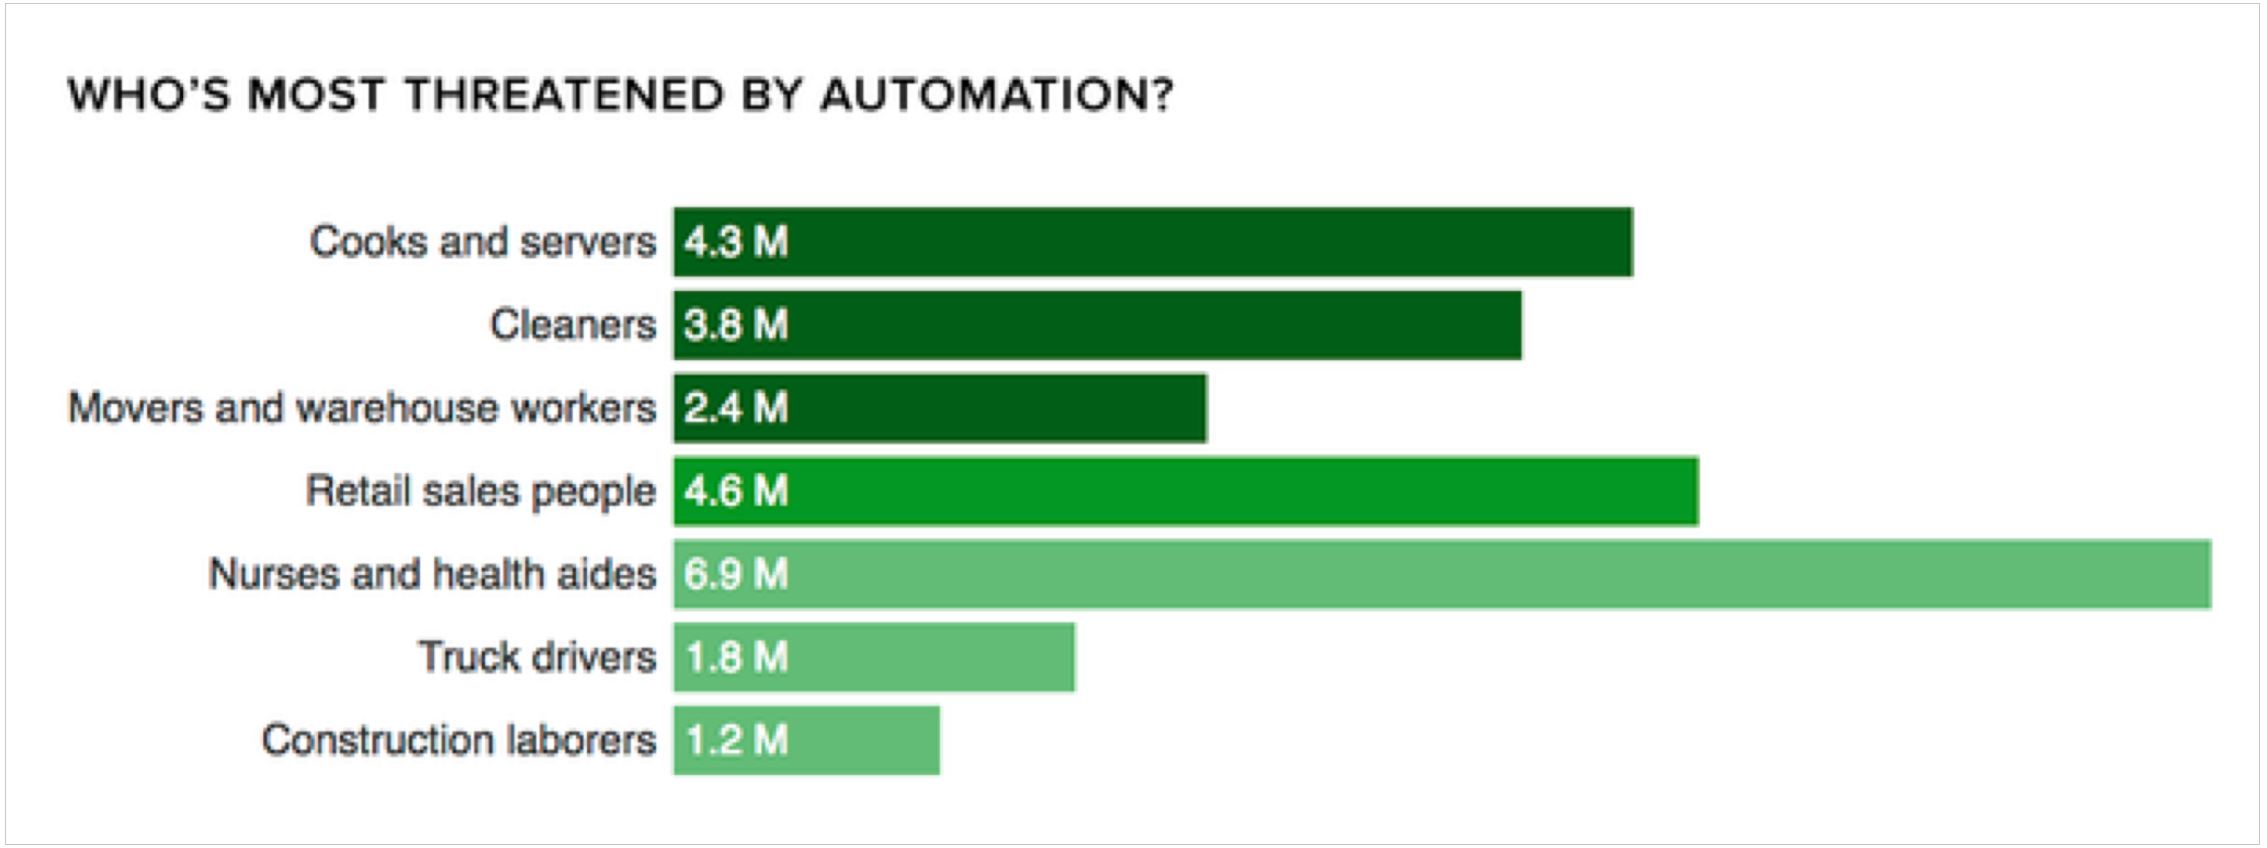
Neural Networks
Cognitive System
Planning
Knowledge
Artificial Intelligence
Robotics
Perception
Machine Learning
Natural Language Processing

CBS news claims a large number of jobs will be replaced by machines.

“At least 10 million U.S. jobs have a high risk of bowing to automation in the next decade as companies deploy machine that can learn…”

“A.I. Expert Says Automation Could Replace 40% of Jobs in 15 Years”

Jobs most likely to be impacted by AI:



AI provides opportunity to learn and grow.

AI aides in finding solutions.
